❖ LANGUAGE : (12 marks)

1/ Fill in the blanks with six words from the box below . Be careful !

There are two extra words (0.5 × 6 = 3 marks)

invisible – accumulate – which – breathing – covered – Therefore –  
smog – However

It's really a tragedy to realize that it is man who is destroying his own life . You can see clouds of (1).....which travel in the air . You can see beaches (2).....with oil to say nothing of the rivers which are turned red by chemicals . All these are clear examples of pollution . (3).....there are types of pollution which can not be seen . For example , (4).....gases may travel over our towns and cities . That's why people develop asthma and (5).....problems . These gases are hazardous pollutants (6).....kill our green trees too . Winds can carry pollutants thousands of kilometers away from one side of an ocean to the other . As a result , chemicals flowing in large rivers can pollute many countries on their way to the sea .

2/ Circle the right option (0.5 × 6 = 3 marks)

The planet's water reserves are constantly polluted by waste from agriculture , industries and sewers . Since water is always circulating through the environment, it transports the (pollution / polluted / pollutants) it contains from one area to the next .

A pesticide that is (sprayed / spread / crowded) on a field . For example , seeps into the ground water , finds its way to a stream and finally ends up in the ocean . These toxic (substance / substances / substancial) harm aquatic plants and animals , and also infect the food chain causing certain plant and animal species to become (extinct / extinction / extincted) . They can also (breathe / contaminate / effect) humans who eat fish . Even though (dumping / dump / dumped) garbage in the ocean is strictly forbidden , many countries release their untreated sewer waste and dispose of their gabage into the water .

**3/ Put the verbs or words between brackets in the right tense or form**  
(0.5 × 6= 3 marks)

Many species are endangered . They are those species that are considered to be at risk , meaning that they are so few **(leave)**.....of their kind that they could disappear from the planet altogether . Endangered species are **(threaten)**.....by factors such as **(lose)**.....habitat , hunting , disease and climate change , and usually have a **(decrease)**.....population or a very limited range . The current rate of **(extinguish)**.....is thought to be much **(great)**.....than the expected natural rate , with many species going extinct before they have been discovered . However recent studies suggest that a quarter of the world’s mammals and one in eight birds have been endangered .

**4/ Match the sentence parts in column (A) with their their appropriate parts in column (B) . Be careful ! There is an extra sentence part in column (B)**(0.5× 6=3 marks)
